1. Claims 1, 2, 6 and 7 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claims 1 and 2 have been amended to define that the one edge is of a "reduced thickness," the trace-line extending "over the full thickness" of the edge. While it would be agreed that the original disclosure describes a trace-line extending over a constant thickness edge portion that is of reduced thickness (i.e. consistent with new dependent claims 14 and 15), there is not considered to be any original disclosure of a trace-line extending over the full thickness of a broadly defined reduced thickness region. This thus was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention, i.e. it is new matter.

In particular, it is noted that the original disclosure describes (e.g. for fig. 1A) that the edges have an area that is of decreasing thickness ending in tongue of constant thickness, this tongue having the oscillatory trace line. Similar descriptions are provided for figs. 2 and 3, i.e. in which it is the constant thickness portion that has the trace-line. There is thus no original description of the trace-line extending over the full thickness of a reduced thickness region other than in the context of the reduced thickness region being of constant thickness.

This description/new matter rejection would however be overcome by incorporation of the requirements of claims 14/15 in the respective independent claims.

2. Claims 10-11 are objected to because of the following informalities:

In claim 10, line 5, it appears that "edge of both" should be *—edge or both—*.

Appropriate correction is required.

3. Applicant's arguments filed October 10, 2003 have been fully considered and they are persuasive but note the new 35 USC 112, first paragraph rejection of claims 1, 2, 6 and 7 necessitated by the amendments to the claims.

4. Claims 14 and 15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 10 and 11 are allowable except for the minor objection noted above.

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
